

### **Title:**

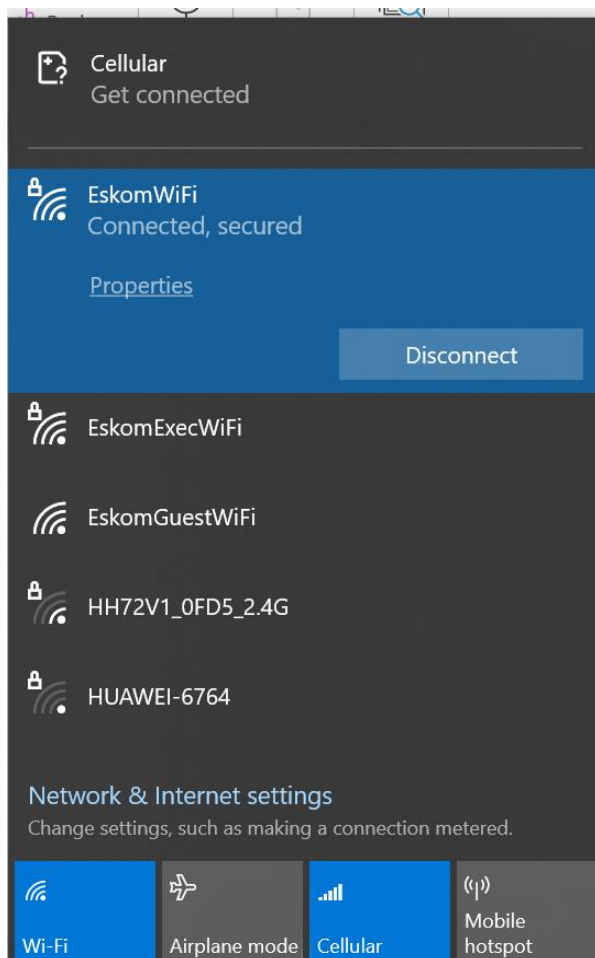

Laptop not detecting 3g Sim. Cellular not connected is displayed.

### **Summary/ Intro:**

Lenovo L14 Gen2. After inserting the 3g sim, unable to connect via the sim. Celular get connected is displayed.

### **Steps:**

Click on Network & Internet Settings.

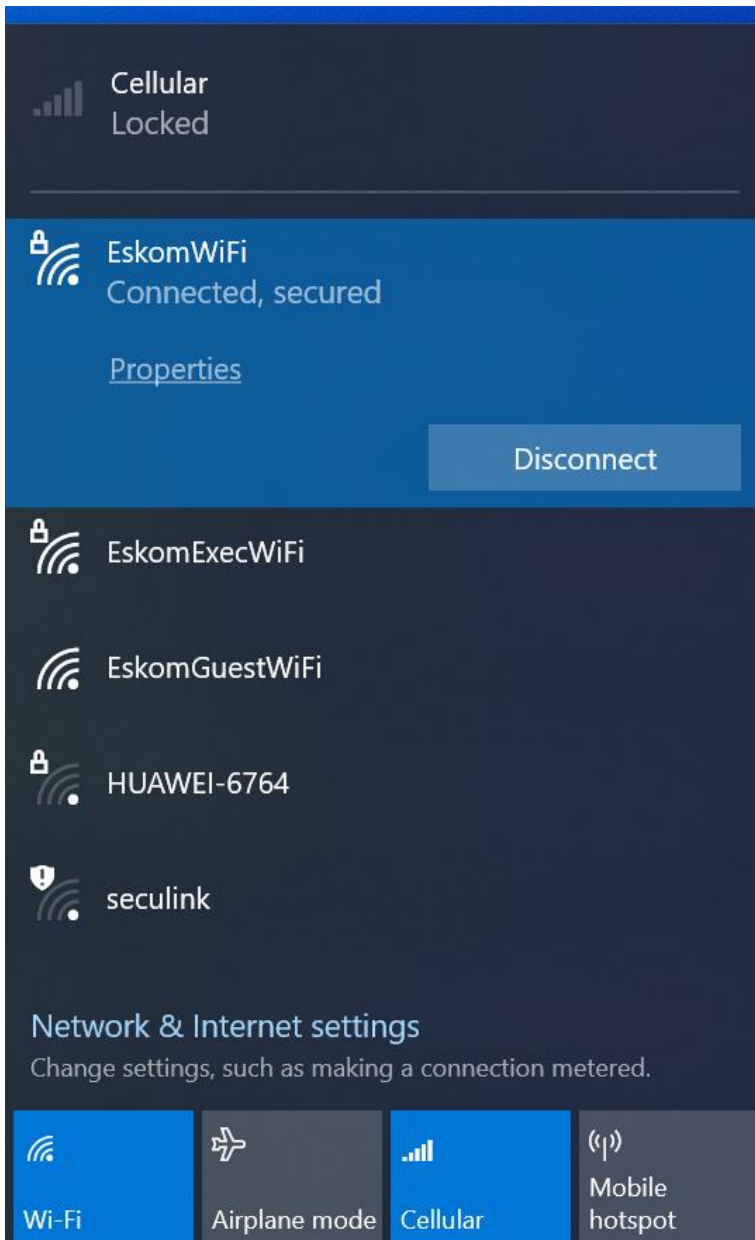

## Select Cellular.

## Select Sim 1.

The screenshot shows the Windows Settings application. On the left is the 'Settings' sidebar with a search bar and a list of categories: Home, Network & Internet, Status, Wi-Fi, Cellular (highlighted with a blue bar), Ethernet, Dial-up, VPN, Airplane mode, Mobile hotspot, and Proxy. The main area is titled 'Cellular'. At the top, there's a dropdown menu for SIM selection with 'SIM 1' and 'SIM 2' (highlighted in blue). Below this is a 'Cellular' section with a plus icon and the text 'Get connected'. A message states: 'Buy a data plan or activate an eSIM profile to get connected using cellular data.' Below this is a 'Connect with a data plan' button and a link to 'Manage eSIM profiles'. There is an unchecked checkbox for 'Let Windows keep me connected' with a note: 'You need to connect manually each time you want to use your cellular data.' Under 'Data roaming options', there is a dropdown menu set to 'Don't roam' and a note: 'When entering a roaming area, your data connection will be turned off.' At the bottom are links for 'Manage eSIM profiles' and 'Advanced options'.

You should now be able to unlock sim card that has been inserted.
