

Title:

Quick Steps to boost your machine's performance.

Summary/ Intro:

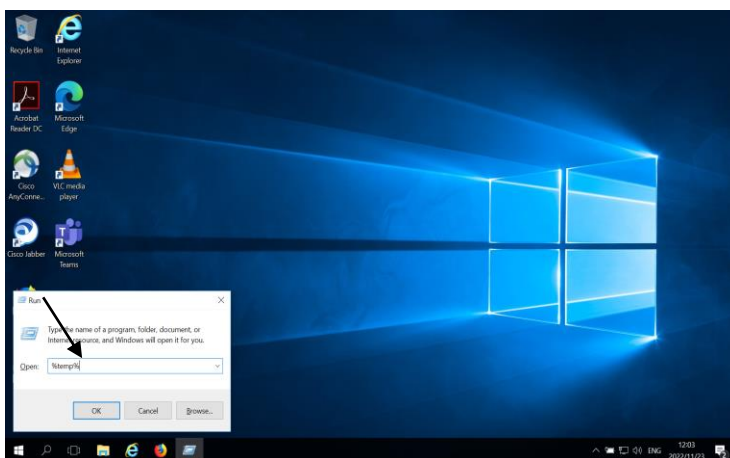

This Guide will improve your Laptop/ Desktop Performance.

Steps:

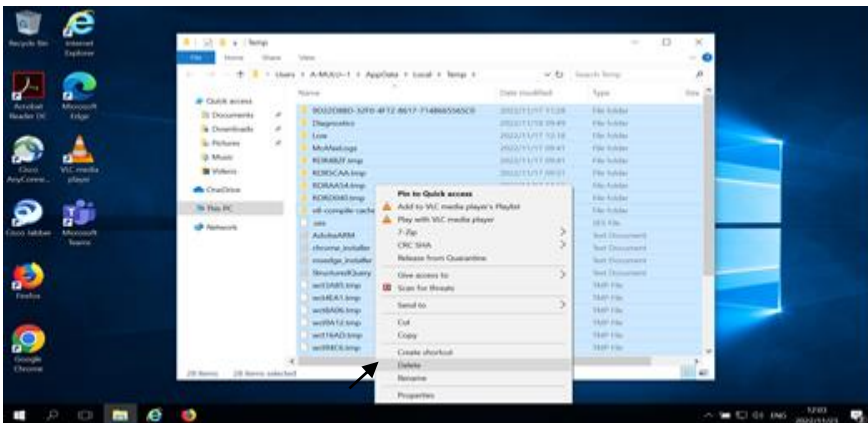

Step 1. **Log into** your machine

Step 2. Press and hold **WINDOWS** button and letter **R** on your keyboard.

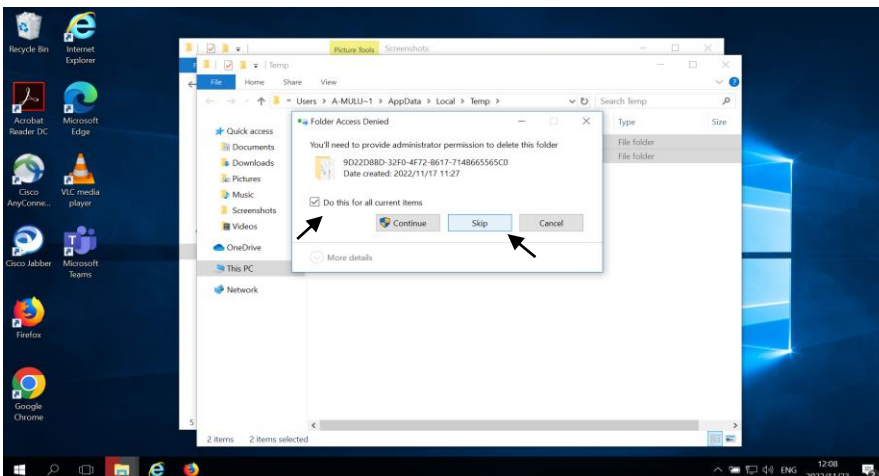

Step 3. On the pop-up box type **%temp%** then **OK**.

Step 4. Once all your temp files are open, press **CTRL+A** to select all files. Right Click and go to **DELETE**.

Step 5. Select **Skip** for the files that are unable to delete.

Conclusion:

It is advisable that you also empty your recycle bin to permanently delete the temp files from your machine.
