Title:

Configuring Eskom APN

Summary/ Intro:

Before configuring eskom APN you need to first check on network icon if the Vodacom or 3g is not locked. If it's locked, unlock it using the sim pin provided with the sim card.

Steps:

1 Click on network icon on bottom right of computer.

2 click on network & internet settings.

3 Select cellular on your left hand side.

4 select advanced options on the right hand side.

5 Scroll down the select + on APN.

6 Under profile name type (Eskom) ,under APN type (Eskom1) the you scroll down and save.

7 Go back to network icon to test connectivity.

Conclusion (Optional):
