Title:

How to copy data on a machine that goes to recovery mode on start up for Windows 10

Summary/ Intro:

This guide will help you recover data on a windows 10 machine that cannot be restored and keeps on going to system recovery and diagnostics and cannot reset windows.

Steps:

Click on advance options

Select Command prompt
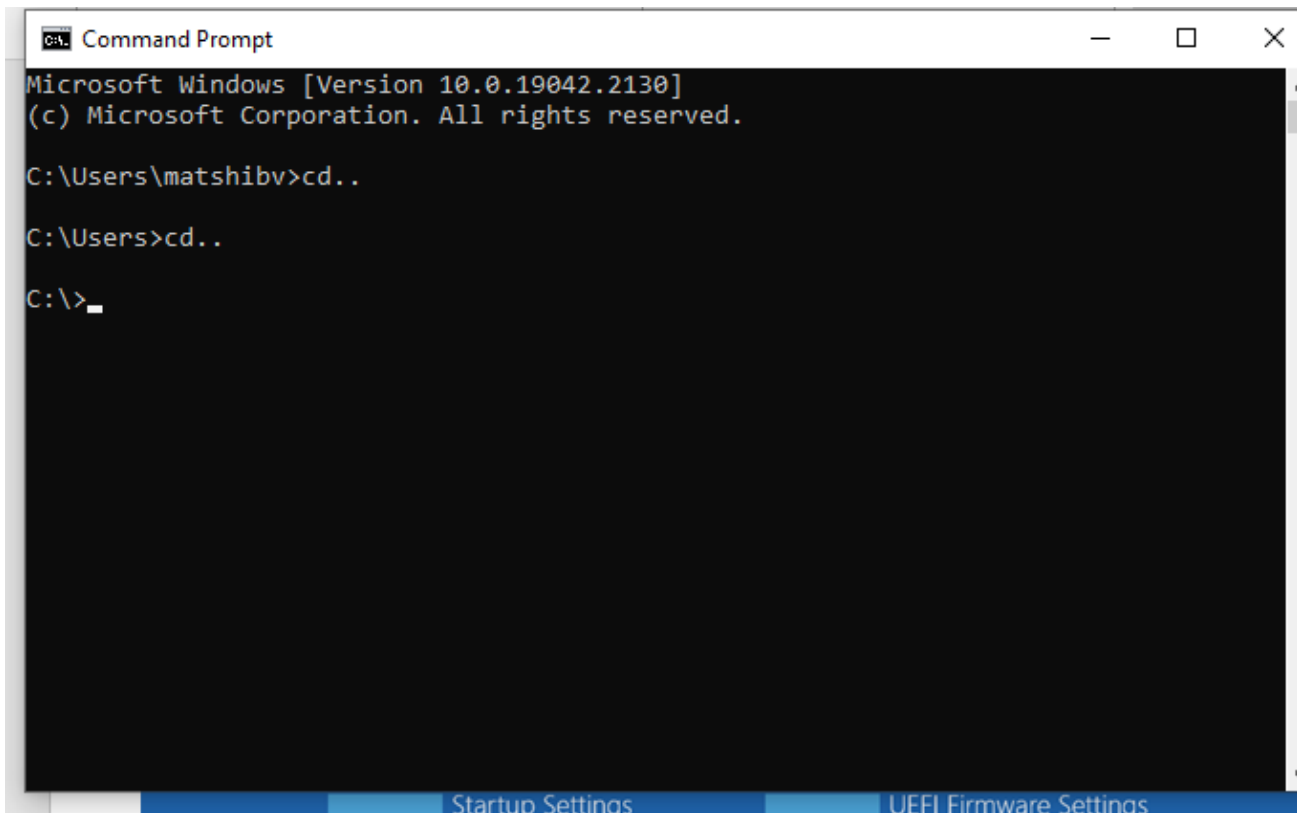

Once the command

 prompt is open

Type:

cd..

or c:

Xcopy c:\users\usersname\ usbdriveletter:\foldername

Eg - Xcopy c:\users\nkgwete\ f:\nkgwetedata

Or

Xcopy /E c:\users\username\ usbdriveletter:\foldername

Xcopy /E c:\users\nkgwete\ e:\nkgwetedata

Conclusion (Optional):

Data will then start to copy and will be done.
